

Air compressor sets

Mobile air compressor sets

MM3-03-ПБ6/0,7-Р2 and MM3-ПБ 10/10

Air compressor sets are used for compressed air supply equipment and machinery located at sites with limited or no electric power supply as well as for operation in hard climatic conditions. The air compressor sets application – construction, road building and repair work.

Advantages:

1. Smooth connection of diesel engine with compressor via the clutch mechanism.
2. Availability of technical service: the air compressor set manufacturer (MMP) is also the manufacturer of diesel engines D243 and D245 (drive units).
3. High reliability and long operation life.
4. Simplicity of operation and maintenance.
5. Stable work during a long operation life.

Technical specifications	MM3-03-ПБ6/0,7-Р2	MM3-ПБ 10/10
Rated operation pressure, atm.	7,0	10,0
Productivity, m ³ /min	up to 6,0	up to 10,0
Fuel consumption, kg/hour	up to 9,2	up to 17,2
Drive	Diesel engine D-243 liquid cooling	Diesel engine D-245 liquid cooling
Compressor block	ROTORCOMP (Germany)	ROTORCOMP (Germany)
Dimensions (length, width, height), mm	3500x1650x1750	3750x1800x1980
Dry mass, kg	1350	1800
Warranty period	12 months of the date of shipment	12 months of the date of shipment
